

Spring 1 Whole School Family Learning Project

Focus: Maths

Maths Superhero: We all need a little help in our maths lessons from time to time. Imagine if there was someone or something out there that could step in to save the day!

Your challenge this half term is to create your very own Maths Superhero! Think about the things you are learning at the moment or things that you have found tricky in the past. What superpowers would a superhero need to help you? It could be a walking talking arithmetic machine or even a counting caterpillar with plenty of legs to help you keep track! Whether you make a poster, a puppet or even a story book, we can't wait to meet your hero and find out about their powers.

Spring 1 Whole School Family Learning Project

Focus: Maths

Please return your completed project, making sure it has your name and class clearly labelled on it, to the school office on Monday 6th February.

We will then create a showcase of all your fantastic learning in the hall to share with others. We will be giving out some fantastic prizes for the most creative entries.
